Screen demonstrates its EQUIOSNET connectivity and welcomes partners to its Partnership Program

Exciting opportunities lie ahead as Screen prepares to partner with like-minded companies and presents its universal workflow at the Ipex Print Automation Pavilion

Screen will present its EQUIOSNET single universal production environment as part of its involvement in the CIP4 Print Automation Pavilion in Hall 7 at Ipex, where advancements in print automation will be highlighted.

For end-to-end automation to be introduced, it is necessary to have the ability to automatically link across vendor boundaries. Therefore Screen will begin licensing its imposition function of its EQUIOSNET universal workflow to vendors of MIS, web-to-print and other relevant products as part of its EQUIOSNET Partnership Program.

The EQUIOSNET environment encompasses a range of software solutions to provide a highly-optimised and automated workflow driving multiple CTP and print on demand devices. The EQUIOSNET Partnership Program is a workflow collaboration scheme between Screen and a wide range of specialist graphic arts vendors, designed to enable end-to-end automation via JDF integration from the desktop, via web-to-print and MIS through platesetting, printing and finishing.

As part of the EQUIOSNET Partnership Program, Screen provides an open standard interface to all partner vendors to connect with Screen's workflow products and offers its considerable technical expertise to enhance end-to-end automation. The program will provide a variety of printing solutions that use end-to-end automation to prevent human error, shorten turnaround time and optimize the overall production process.

A list of current partners can be seen at www.screen.co.jp/ga_dtp/en/partner/index.html

All exhibitors in the Print Automation Pavilion will be networked together, providing the ideal environment for visitors and potential vendor suppliers to see first hand how systems can be integrated. Screen will demonstrate the EQUIOSNET Imposition module at its stand.

"Ipex is the ideal opportunity to discuss ideas for development with suitable partners," says Sjaak Veeken, Workflow Product Manager at Screen Europe. "EQUIOSNET is a truly integrated solution for CTP and digital print production and our Partnership Program will advance the trend towards the use of more automated and efficient systems and open up a world of business opportunities for print companies."

SCREEN

'Your Wish is our Print on Demand' is Screen's promise for Ipex, where it will show visitors the broadest range of precision digital presses for the broadest range of applications. Solutions for commercial print, direct mail, transpromo, books, newspapers, large format display graphics and industrial printing, all driven by EQUIOSNET, can be found at Screen's main stand (Hall 10/C290).
